PROJECTS

Facial Analysis and Smart Prediction System | Python, Redis, Streamlit, InsightFace Models

Oct 2023

- Engineered a real-time object detection system using InsightFace and OpenCV, achieving 98% accuracy in identifying objects across diverse datasets, while adhering to strict cybersecurity standards.
- Integrated InsightFace Buffalo_L model for face recognition and feature extraction, improving detection accuracy by 18% over baseline.
- Designed and deployed a Streamlit-based user interface, enabling real-time interaction with minimal latency.
- Tested and validated the model on a dataset of 1000+ images with varied lighting and backgrounds to ensure robustness.

KrishiConnect - Agricultural Information Portal | JavaScript, React.js, HTML/CSS, Vercel

Apr 2025

- Developed and integrated a real-time weather forecasting feature using third-party weather APIs, enhancing the platform's utility for location-based decision making.
- Collaborated with a cross-functional team of 4 to deploy a full-stack React-based portal hosted on Vercel, ensuring seamless user experience and responsiveness.
- Enabled access to dynamic agricultural insights including government schemes, news updates, and articles, impacting awareness for rural users.
- Ensured component modularity and reusability using React best practices, leading to 25% reduction in development time for feature updates.
